The Department of Diagnostic Radiology provides medical imaging for the diagnosis and follow-up of a wide range of medical conditions. Our radiologists and radiographers are trained healthcare professionals that work closely with referring clinicians. We care for a diverse range of patients, providing radiology support for in-patient services and out-patient clinics for both Hospital Authority and private healthcare services. The facilities also support clinical training and research activities.

We serve self-financed patients as well as patients funded by charity organisations. Imaging investigations offered include CT, 3T MRI and PET-CT.
